

Workforce Authentication: What's in Your Five-Year Plan?

Hosted by

Jeff Carpenter - *Cloud Authentication Product Marketing Director,
HID Global*

Tom Field - *Senior Vice President, Editorial, Information Security
Media Group*

Agenda

3:30 p.m. - Introductions and Opening Remarks

3:45 p.m. - Roundtable Discussion

4:45 p.m. - Closing Remarks and Questions

5:00 p.m. - Program Concludes

Introduction

What does workforce authentication look like in your organization today? You have employees and third-party contractors deployed remotely, accessing critical applications from every variety of devices and networks. But are you still reliant on traditional authentication factors to verify identities and grant access? How are you balancing user convenience with secure access and the need to protect digital assets? And as this fully remote workforce becomes the norm, how do you envision workforce authentication in five years?

If you're looking for answers to these questions, then welcome to this exclusive virtual roundtable on **Workforce Authentication: What's in Your Five-Year Plan?**

Guided by insights from Jeff Carpenter, cloud authentication product marketing director with event sponsor HID Global, this invitation-only forum will also draw upon the experiences of the attendees. Participants will discuss the challenges of workforce authentication today and how their practices just evolve to anticipate the challenges of tomorrow.

Among the discussion topics:

- Where are your employees working today, and how are they accessing critical apps?
- What authentication factors do you use, and how do you approach the notion of passwordless authentication?
- What are your authentication practices for third-party partners and contractors?

You'll have the opportunity to discuss the future of workforce authentication with a handful of senior executives and market leaders in an informal, virtual setting, from which you will emerge with new strategies, solutions and relationships you can immediately put to work.

Discussion Points

Among the questions to be presented for open discourse:

- Where are your employees working today, and how are they accessing critical apps?
- What authentication factors do you use, and how do you approach the notion of passwordless authentication?
- What are your authentication practices for third-party partners and contractors?
- Where do you see your biggest authentication gaps, and how do you plan to address them?

About the Expert

Joining our discussion today to share the latest insights and case studies:

Jeff Carpenter

*Cloud Authentication Product Marketing Director,
HID Global*

In his 15+ years in cybersecurity, Carpenter has held positions with several top cybersecurity and technology companies, including Crossmatch and RSA, a Dell Technologies company. He holds both Certified Information Systems Security Professional (CISSP) and Certified Cloud Security Professional (CCSP) designations.

About HID Global

HID Global powers the trusted identities of the world's people, places and things. We make it possible for people to transact safely, work productively and travel freely. Our trusted identity solutions give people convenient access to physical and digital places and connect things that can be identified, verified and tracked digitally. Millions of people around the world use HID products and services to navigate their everyday lives, and over 2 billion things are connected through HID technology. We work with governments, educational institutions, hospitals, financial institutions, industrial businesses and some of the most innovative companies on the planet.

Headquartered in Austin, Texas, HID Global has over 4,000 employees worldwide and operates international offices that support more than 100 countries. HID Global is an ASSA ABLOY Group brand. For more information, visit www.hidglobal.com.

About the Moderator

Leading our discussion today is:

Tom Field

Senior Vice President, Editorial, ISMG

Field is an award-winning journalist with over 30 years of experience in newspapers, magazines, books, events and electronic media. A veteran journalist with extensive business/technology and international reporting experience, Field joined ISMG in 2007 and currently oversees the editorial operations for all of ISMG's global media properties. An accomplished public speaker, Field has developed and moderated scores of podcasts, webcasts, roundtables and conferences and has appeared at the RSA Conference and on various C-SPAN, The History Channel and Travel Channel television programs.

About ISMG

Information Security Media Group (ISMG) is the world's largest media organization devoted solely to information security and risk management. Each of our 28 media properties provides education, research and news that is specifically tailored to key vertical sectors including banking, healthcare and the public sector; geographies from the North America to Southeast Asia; and topics such as data breach prevention, cyber risk assessment and fraud. Our annual global summit series connects senior security professionals with industry thought leaders to find actionable solutions for pressing cybersecurity challenges.
