Hosted by

Steve Schlarman - *Director/Digital Risk Management Strategist, RSA*

Tom Field - *Senior Vice President - Editorial, ISMG*

Agenda

4:00 p.m. - Introductions and Opening Remarks

4:15 p.m. - Roundtable Discussion

5:15 p.m. - Closing Remarks and Questions

5:30 p.m. - Program Concludes

Introduction

The world in 2020 experienced an unprecedented business disruption that instantly created the largest remote workforce – and largest attack surface – in history.

But that is only one of the forces driving today's dynamic workforce. Add to that the shifting workplace demographics and the increased globalization of work, and you have a new work environment where how we connect to information and each other is evolving.

How do you validate users and access in this new dynamic workforce? How do you keep workers agile while still protecting resources? How do you respond to intentional and unintentional access abuse?

This latest edition of our exclusive Digital Risk Management Dialogues Series on **The New Keys to Managing Dynamic Workforce Risk** will provide answers to these and other critical questions.

Guided by insights from Steve Schlarman, Field CTO for event sponsor RSA, this virtual roundtable will help define this new dynamic workforce, as well as draw from the experiences of the attendees, offering tips on how they have been able to help organizations manage these new risks, including how to know:

- Who users are;
- Who has access to what;
- What users are doing in your extended environment.

Learn from your peers how they are re-imagining and managing dynamic workforce risks.

Discussion Points

Among the questions to be presented for open discourse:

- What percentage of your workforce will remain remote permanently going forward?
- How do you validate users and access in this new dynamic workforce?
- Where are the gaps in how you currently validate users and access?
- How do you keep workers agile while still protecting resources?
- How do you respond to intentional and unintentional access abuse?

About the Expert

Joining our discussion today to share the latest insights and case studies:

Steve Schlarman

Director/Digital Risk Management Strategist, RSA

Steve Schlarman, Director/Digital Risk Management Strategist, for RSA, is responsible for applying his experience in risk and security management to solutions focused on managing risk related to digital transformation.
