

Make the Cloud Your Safe Place: The Future of Cloud Security

Hosted by

Homayun Yaqub - *Senior Director of Strategy, Forcepoint*

Tom Field - *SVP - Editorial, ISMG*

Agenda

3:30 p.m. - Introductions and Opening Remarks

3:45 p.m. - Roundtable Discussion

4:45 p.m. - Closing Remarks and Questions

5:00 p.m. - Program Concludes

Introduction

Digital transformation inverts network and security service design patterns, shifting the focus to the secure interactions of users and data wherever they are - more often outside of traditional enterprise perimeters. Enterprise architects and security leaders need a re-architected, converged cloud-delivered secure access service edge to address this shift.

But what are some best practices for moving network security from the data center to the cloud? What are the essentials of secure access service edge frameworks, and how can they be implemented? How can you do so while maintaining visibility and compliance over your entire organization?

This virtual executive roundtable on **Make the Cloud Your Safe Place: The Future of Cloud Security** will provide answers to these and other critical questions

Guided by insights from Hodayun Yaqub, senior director of strategy at event sponsor Forcepoint, this invitation-only session will also draw upon the experiences of the attendees, who will discuss the essential components of the future of cloud security.

Among the discussion topics:

- Where is your organization in its journey to the cloud?
- What is different about securing a cloud environment?
- Would you prefer to extend on-premises security to the cloud or extend cloud security to on-prem?

You'll have the opportunity to discuss cloud security with a handful of senior executives and market leaders in an informal, virtual setting, from which you will emerge with new strategies and solutions you can immediately put to work.

Discussion Points

Among the questions to be presented for open discourse:

- Where is your organization in your journey to the cloud?
- What – if anything – is holding you back?
- What lessons have you learned about securing a cloud environment?
- Would you prefer to extend on-premises security to the cloud or extend cloud security to on-prem?

About the Expert

Leading our discussion today is:

Hodayun Yaqub

Senior Director, Strategy, Forcepoint

Yaqub partners with executives across various verticals to architect and deliver Forcepoint solutions to address human-centric business issues and better enable security/risk managers to safeguard their data and people assets. Before joining Forcepoint, Yaqub was an executive director on JP Morgan Chase's Global Security Team, leading the firm's Global Safeguard Program. Before that, he served in leadership roles in the Department of Defense, leading specialized threat and risk management programs addressing critical national security concerns. He also was a founding member of The MASY Group, a Washington-based security and risk management consulting firm.

About Forcepoint

Forcepoint is the global cybersecurity leader for user and data protection. Forcepoint's behavior-based solutions adapt to risk in real time and are delivered through a converged security platform that protects network users and cloud access, prevents confidential data from leaving the corporate network, and eliminates breaches caused by insiders. Based in Austin, Texas, Forcepoint creates safe, trusted environments for thousands of enterprise and government customers and their employees in more than 150 countries. www.forcepoint.com.

About the Moderator

Leading our discussion today is:

Tom Field

SVP - Editorial, ISMG

Field is an award-winning journalist with over 30 years of experience in newspapers, magazines, books, events and electronic media. A veteran journalist with extensive business/technology and international reporting experience, Field joined ISMG in 2007 and currently oversees the editorial operations for all of ISMG's global media properties. An accomplished public speaker, Field has developed and moderated scores of podcasts, webcasts, roundtables and conferences and has appeared at the RSA Conference and on various C-SPAN, The History Channel and Travel Channel television programs.

About ISMG

Information Security Media Group (ISMG) is the world's largest media organization devoted solely to information security and risk management. Each of our 28 media properties provides education, research and news that is specifically tailored to key vertical sectors including banking, healthcare and the public sector; geographies from the North America to Southeast Asia; and topics such as data breach prevention, cyber risk assessment and fraud. Our annual global summit series connects senior security professionals with industry thought leaders to find actionable solutions for pressing cybersecurity challenges.
