

Dynamic Work – Securely Enabling the Nomadic Workforce via Zero Trust

Hosted by

Lindsey Bly – *Product Marketing Manager, Okta*

Nick Holland – *Director, Banking and Payments, ISMG*

Agenda

4:00 p.m. – Introductions and Opening Remarks

4:15 p.m. – Roundtable Discussion

5:15 p.m. – Closing Remarks and Questions

5:30 p.m. – Program Concludes

Introduction

Over the last few months the reality has set in – post pandemic, work will be something you do, not somewhere you go. We call this “dynamic work.” It’s more than just letting employees work from home and ensuring they have the necessary tools to do so. It’s rethinking how and where we hire and how our offices are designed. And all this requires a “zero trust” approach to security.

What are the security risks of workers operating in a perimeter-free environment? What tools and technologies are needed? And how can the “zero trust” approach support this new way of working?

This exclusive virtual roundtable discussion on **Dynamic Work – Securely Enabling the Nomadic Workforce via Zero Trust** will provide answers to these and other critical questions.

Guided by insights from Lindsey Bly, Product Marketing Manager at event sponsor Okta, this invitation-only virtual event will also draw upon the experiences of the attendees, who will discuss the future of securing remote work.

Among the discussion topics:

- How can organizations plan for a dynamic work environment?
- How can a “zero trust” roadmap ensure that employees can work securely, regardless of their location?
- What security tools and technologies should be used if the perimeter-based approach no longer applies?

You’ll have the opportunity to discuss the unique challenges of this new remote workforce with a handful of senior executives and market leaders in an informal, virtual setting, from which you will emerge with new strategies and solutions you can immediately put to work.

Discussion Points

Among the questions to be presented for open discourse:

- What have been your top challenges in supporting the new remote workforce?
- How can you develop your security posture to deal with “dynamic work”?
- Where should you begin your journey to an identity-centric approach?
- How do you quickly deploy new apps and provide access to existing cloud and on-premises applications?
- What tools and technologies will you need to implement to secure “dynamic work”?

About the Expert

Leading our discussion today is:

Lindsey Bly

Senior Product Marketing Manager, Okta

Bly helps organizations leverage Okta products to solve business problems. She has nearly a decade of SaaS experience spanning consulting, strategy, operations and go-to-market. Previously, she served on Okta's product strategy team, where she led market research, validation and long-term product strategy.

About Okta

Okta is the leading independent provider of identity for the enterprise. The Okta Identity Cloud enables organizations to securely connect the right people to the right technologies at the right time. With over 6,500 pre-built integrations to applications and infrastructure providers, Okta customers can easily and securely use the best technologies for their business. Over 7,950 organizations, including 20th Century Fox, JetBlue, Nordstrom, Slack, Teach for America and Twilio, trust Okta to help protect the identities of their workforces and customers.

About the Moderator

Leading our discussion today is:

Nick Holland

Director, Banking and Payments, ISMG

Holland, an experienced security analyst, has spent the last decade focusing on the intersection of digital banking, payments and security technologies. He has spoken at a variety of conferences and events, including Mobile World Congress, Money2020, Next Bank and SXSW, and has been quoted by The Wall Street Journal, CNN Money, MSNBC, NPR, Forbes, Fortune, BusinessWeek, Time Magazine, The Economist and the Financial Times. He holds an MSc degree in information systems management from the University of Stirling, Scotland.

About ISMG

Information Security Media Group (ISMG) is the world's largest media organization devoted solely to information security and risk management. Each of our 28 media properties provides education, research and news that is specifically tailored to key vertical sectors including banking, healthcare and the public sector; geographies from North America to Southeast Asia; and topics such as data breach prevention, cyber risk assessment and fraud. Our annual global summit series connects senior security professionals with industry thought leaders to find actionable solutions for pressing cybersecurity challenges.
