

Identity Transformation: The Future Is Now

Hosted by

Bil Harmer - *Chief Information Security Officer and
Chief Evangelist, SecureAuth*

Tom Field - *Senior Vice President - Editorial, ISMG*

Agenda

3:30 p.m. - Introductions and Opening Remarks

3:45 p.m. - Roundtable Discussion

4:45 p.m. - Closing Remarks and Questions

Introduction

In this digitally transformed world, where workforce and customers alike interact with you from any location, via any device and platform, identity is everything – in some cases, it is the only thing between your organization and a costly breach.

But how do you know with certainty that your users are who they purport to be? How have you evolved your identity strategy beyond mere user names and passwords? Do you have a roadmap to a passwordless future – and if so, where are you on that journey?

This virtual executive roundtable on **Identity Transformation: The Future is Now** will provide answers to these and other critical questions.

Guided by insights from Bil Harmer, chief information security officer and chief evangelist at event sponsor SecureAuth, this invitation-only forum will also draw upon the experiences of the attendees. Participants will learn about emerging technologies and strategies to, as Harmer puts it, “bring trust back to a zero trust world.”

Among the discussion topics:

- Why are users not the weakest link in the security chain;
- What are the most effective components of a true multifactor authentication strategy?
- What is the future of secure identity – and what are the important milestones along the way?

You’ll have the opportunity to discuss the future of identity with a handful of senior executives and market leaders in this informal, virtual setting, from which you will emerge with new strategies, solutions and relationships you can immediately put to work.

Discussion Points

Among the questions to be presented for open discourse:

- What methods does your organization use to secure identity today?
- Where do you see your biggest gaps in securing identity?
- What role does multifactor authentication play in your identity strategy?
- How do you envision the future of secure identity at your organization?
- What are the obstacles – technical and nontechnical – to reach that future?
- What investments will you make in identity this year?

About the Expert

Leading our discussion today is:

Bil Harmer

CISO and Chief Evangelist, SecureAuth

Bil has been in the IT industry for 30 years. He has been at the forefront of the Internet since 1995 and his work in security began in 1998. He has led security for startups, Government and well established Financial Institutions. In 2007 he pioneered the use of the SAS70 coupled with ISO to create a trusted security audit methodology used by the SaaS industry until the introduction of the SOC2. He has presented on Security and Privacy in Canada, Europe and the US at conferences such as RSA, ISSA, GrrCon and the Cloud Security Alliance. He has been interviewed by and has written for various publications such as Dark Reading, Data Informed, The Belfast Telegraph and Security Intelligence. His vision and technical abilities have been used on advisory boards for Adallom, Trust Science, ShieldX, Resolve and Integris. He has served as Chief Security

About SecureAuth

SecureAuth, the secure identity company, provides the most advanced identity security solution for large organizations globally to enable secure access to systems, applications and data. Our customers leverage our flexible, enterprise-grade identity and access platform coupled with the SecureAuth Intelligent Identity Cloud service to deliver the most secure, frictionless user experience for their customers, partners and employees everywhere, exponentially reducing the threat surface, enabling user adoption and meeting business demands. To learn more, visit www.secureauth.com, or connect with us at info@secureauth.com

About the Moderator

Leading our discussion today is:

Tom Field

Senior Vice President - Editorial, ISMG

Field is an award-winning journalist with over 30 years of experience in newspapers, magazines, books, events and electronic media. A veteran journalist with extensive business/technology and international reporting experience, Field joined ISMG in 2007 and currently oversees the editorial operations for all of ISMG's global media properties. An accomplished public speaker, Field has developed and moderated scores of podcasts, webcasts, roundtables and conferences and has appeared at the RSA Conference and on C-SPAN, The History Channel and Travel Channel television programs.

About ISMG

Information Security Media Group (ISMG) is the world's largest media organization devoted solely to information security and risk management. Each of our 28 media properties provides education, research and news that is specifically tailored to key vertical sectors including banking, healthcare and the public sector; geographies from the North America to Southeast Asia; and topics such as data breach prevention, cyber risk assessment and fraud. Our annual global summit series connects senior security professionals with industry thought leaders to find actionable solutions for pressing cybersecurity challenges.
