

# Rightsizing Your Cybersecurity Posture for the Age of the Remote Workplace

## Hosted by

Pam Kubiowski - *Senior Director, Transformation Strategy, Zscaler*

Tom Field - *Senior Vice President, Editorial, ISMG*

## Agenda

3:30pm - Introductions and Opening Remarks

3:45pm - Roundtable Discussion

4:45pm - Closing Remarks and Questions

# Introduction

The COVID-19 pandemic has been a globally catalytic event, forcing organizations around the world to move their employees to remote work environments. The pandemic will eventually abate, but the shift to a work-from-home culture will likely be irreversible as organizations realize the opportunities of a remote workforce that is competitive, productive and most of all, secure.

But how do today's organizations right size to enable the best of both worlds? What is the optimal balance of remote and onsite employees for your organization? How can I trust that their cybersecurity is as secure offsite as onsite? And what will it take for my organization to transition to this new WFH paradigm?

If you're looking for new answers to these questions, then join ISMG's Tom Field for an exclusive roundtable discussion on **Rightsizing Your Cybersecurity Posture for the Age of the Remote Workplace**. This invitation-only discussion will draw from the experiences of the attendees, offering thoughts on how they have adjusted to recent events.

Among the discussion topics:

- How well prepared is my organization for this new normal of a majority remote workforce?
- What are my greatest concerns today in dealing with remote workforce cybersecurity and how can these be addressed?
- How can a zero trust posture assist in the transition to a dynamic and globally distributed remote workforce?
- How does my organization "right size" to remain competitive once the kinks of a remote workforce are ironed out?

Joining Tom to provide expert insight is Pam Kubiowski, Senior Director of Transformation Strategy from Zscaler. You'll have the opportunity to discuss the topic with a handful of senior executives and market leaders in an informal, closed-door setting, from which you will emerge with new strategies and solutions you can immediately put to work.

# Discussion Points

Among the questions to be presented for open discourse:

- To what degree do you expect your workforce to remain remote after the COVID-19 pandemic?
- What are the greatest risks being faced from a remote workforce today?
- How do I get mindshare for cybersecurity budgets when executives are more focused on business continuity efforts at an operational level?
- How do I “right-size” the organization’s cybersecurity stance going forward?
- Which technology investments will be the greatest priority for maintaining a secure remote workforce?

# About the Expert

Leading our discussion today is:

## Pam Kubiowski

*Senior Director, Transformation Strategy, Zscaler*

Kubiowski is an IT Executive and Change Champion with 25 years of experience in managing large multi-faceted global IT organizations. Prior to joining Zscaler, she served as the director of global network services & data centers at Abbott Labs. There she led a multi-phased Network Transformation Program that simplified and strengthened the security posture for the company which is in over 130 countries.
